

## SPRINT #4

### DAILY SCRUM MEETINGS

**Purpose** – to discuss what has been done the previous day, what will be completed today and what challenges we may be facing.

13/10/2021:

**Sprint Planning Meeting with Rylan (see relevant documents)**

Kineta: Hi Everyone. Please don't forget about the spring planning meeting at 2:30 🌹

Ryan: I am going to have loadshedding at that time 😞 I just saw now

Kineta: Sorry dude 😞 don't worry I will fill you in

Jack: I might be a few minutes late as my load shedding ends just before the meeting

Kineta: No worries, Rylan usually waits a few minutes

Kineta: Hi Everyone. I am going to add another user story called "User Interface" and this will have all the UI fixes that were recommended by the tutor and Rylan. The sprint task board will be up ASAP but, in the meantime, if there are any extra features or extra things that you'd like to include, please communicate it here on the group ✨

Kineta: Has "forget password" already been implemented on the app?

Bianco Van Der Ross: I think it is I remember jack saying something about it, if so, I wanted to know what criteria his using for that Because I've already started working on something for the web

Jack: Yes, it's just reset the password to their phone number. It was done in sprint 1

Jack: I talked about it when we had a meeting with Rylan, and I couldn't come for the tutor meeting because I was busy else where

Jack: If y'all want we can change it to send the password to their email

Kineta: Uhm. I'd rather not have us change too much around, so we'll try do what you guys have already done

14/10/2021:

Kineta: Today I worked on the sprint planning meet and updated the backlog

15/10/2021:

Kineta: Hi Everyone. The task board for this sprint is up, please select your tasks.

This sprint is due on the 2nd of November. I know there's a lot going on with other project and assignments for other courses but we're so close to the end. so, let's finish strong and make some magic happen 🍀 🌈

Kineta: Today I worked on the task board for this sprint, added all the necessary user stories, with fully documented tasks and added the acceptance criteria for each task and each user story.

17/10/2021:

Jack: to clarify on the missed appointment thing. how to we determine if an appointment was missed ?

Jack: if the doctor was the one to set that an appointment was missed... it's a bit redundant to notify the doctor since he was the one who set it

Kineta: Hmmm. good question 😐 Maybe we can add a little button on the appointment reminder. we can add in a button, or something called "missed appointment" ...

So, let's say the doctor is the one who clicks on it, then it will send a notification to the patient. and if the patient is the one who clicked on it, then it will send a notification to the doctor

Kineta: Do you think this would work and eliminate the redundancy?

Mahdiah Manjra: Just a suggestion. I don't think we should have a button for the patient to click if the appointment is missed. I think doctors usually make it for their appointments. 🧑

But I am okay with implementing it both ways

Kineta: Unless we implement something to see if there was an appointment form generated for that appointment. If no appointment form was generated, then can we assume the appointment had been missed? Alternatively I can email Rylan and ask him for a bit more advice on this user story

Mahdiah Manjra: I think the button idea is okay. We can just ask what the rest of the team thinks 👍

Kineta: Does anyone have any other ideas?

Bianco Van Der Ross: 🙏 fine by me

Kineta: Maybe instead of adding something that says "missed appointment" we can add something that says "reschedule" 😐

Deshan: This makes sense

Kineta: @27824630844 what do you think?

Jack: just have doctors click on a past appointment to set to missed then the patient will be notified. gets the job done and save time

18/10/2021:

Zahraa: Hi guys,

Quick question - for the resizing of webpages on different screens, are all the pages not resizing correctly or is just the homepages and I think the help page ?

Kineta: I think it's mainly the home page, but I haven't checked the others

Zahraa: Ok cool I'll work on those first. Thank you

Bianco Van Der Ross: I'll play around with it and let you know 🤖

19/10/2021:

Zahraa: Today I worked on the resizing of the webpage. No issues

20/10/2021:

Deshan: Worked to add the cancellation feature to the Patient Home Page

Issues: None

Zahraa: Today I worked on the resizing of the webpage. No issues

Kineta: Worked on updating the project document. No issues.

Bianco Van Der Ross: Worked to reset password for forgotten password

Issues: None

22/10/2021:

Deshan: Generalised it to the Doctor Home Page.

Issues: None

Zahraa: Today I worked on the updated to sprint 4. No issues

Bianco Van Der Ross: Finished reset password

Issues: None

23/10/2021:

Zahraa: I've uploaded the updates help page under sprint 4, please let me know if it's resizing correctly or if I need to fix anything

Kineta: Thank you 🙏🙏

Zahraa: Today I worked on the updated to sprint 4. No issues

Kineta: Continued working on project document. No issues.

24/10/2021:

Kineta: Hi Everyone 😞

Sorry to bug but please can I just ask you all to send a message on what you'll be working on for this sprint

Mahdiyah Manjra: Hey. I am working on sending a notification when an appointment is missed

Deshan: Working on cancellations-web

Mahdiyah Manjra: Hey guys, just an update from my side

1) The email address we used to send emails from previously has been blocked by Google. We created a new one

Address: notdiscoveryemails2@gmail.com

Password: SDgroup12

2) I've updated the booking confirmation emails. I've formatted the email and added the CSS file for it.

3) I've also uploaded the missed appointment email notification. What I have done is I added a 'Missed Appointment' button to the already existing Doctor's Appointment History html file. The doctor could press this button if the patient missed an appointment, and an email will be sent to the patient. I've also updated the relevant .js file. I didn't change any of the existing functionalities of the existing html file, just added some stuff

If you have any questions, please ask

Kineta: Awesome stuff!! Thanks so much 🙄💯🌟

Zahraa: I'm still working on the design

For some reason the pages are just not resizing as I want so still working on that

Can someone please let me know if the test page I've uploaded is formatting correctly, it seems to be working on my side but I'm not sure what it looks like on other screens

Also, I've changed the colours to more solid colours, it's blue (this is for the reg/login pages, etc.)

Would everybody like the patient and doctor pages to look the same, like use the same colours or should I leave them as they are - doc is blue and patient is green

Bianco Van Der Ross: Finishing off password reset and working on cancellation

25/10/2021:

Ryan: implemented UI for missed appointment booking

issues: none

Mahdiyah Manjra: Today: Fixed the email notifications for sending appointment confirmation

Issues: None

Zahraa: worked on website formatting issues

Issues: some elements still not fitting to page

Jack: Working on remaking reset password for doctor and patient

Issues: None

26/10/2021:

Kineta: Hi Everyone 🌟 I hope you're all keeping well.

Just a reminder, sprint 4 is due on the 2nd of November (next week Tuesday). We will most likely present to Rylan on Monday so please can I ask that everyone completes their tasks for sprint for ASAP 🙏

I know things have been a bit hectic lately but there are 13 days left of this semester. then it's exams and then we are completely done with our undergrad 😊 So don't give up, we haven't come this far to only come this far!! 💯

Kineta: Oh, and don't forget to send your daily scrum messages. even if you want to send a message towards the end of the week that's also okay 😊

Bianco Van Der Ross: Started debugging others work

Issues: None

Mahdiyah Manjra: Today: Created a new email address and started implementing the missed appointment email notification

Issues: Previous email was hacked

Deshan: Integrated the page with preceding and proceeding

Issues: None

Jack: Working on: Cancel appointment for patient

Issues: None

Kineta: Started working on displaying the user's personal information to them. No issues.

27/10/2021:

Kineta: Sorry for the inconvenience everyone. There was no email from Rylan, I literally figured it out by myself and that's why I emailed him last night for clarification

Mellisha: I'm cool with 4pm

Bianco Van Der Ross: 👍

Deshan: Yeah. 4 should be good

Mahdiyah Manjra: Yep 4 should be fine

Ryan: Yeah, should be fine

Kineta: Booked for 4PM Friday

Deshan: Attempted to add email notifications to cancellation.

Issues: problems with the google account

Mahdiyah Manjra: Today: Continued working on the missed appointment notification html, js and CSS files

Issues: None

Bianco Van Der Ross: Continued debugging and reworking files from old sprint

Issues: emails not working

Jack: Working on delete appointment from database

Issues: None

Ryan: changed email for sending, worked on notifying patient on missed appointment

issues: hacked email

Kineta: Started working on displaying the user's personal information to them.

Issue: with .js file, got help from Deshan to fix the error.

28/10/2021:

Mahdiyah Manjra: Hey, is anyone testing the missed appointment email notification?

I received the email (if you are) 😊

Zahraa: My bad. I'm styling the pages and accidentally clicked 😊

Mahdiyah Manjra: Okay, no worries 😊😂 At least we know it works 👍

Mahdiyah Manjra: Today: Continued working on the missed appointment notification html, js and CSS files

Issues: None

Ryan: implemented help and settings page

issues: none

Bianco Van Der Ross: Reworked reset password to work with email validation

Issues: emails not working

Jack: Working on notify doctor when an appointment was cancelled

Issues: None

Zahraa: changed colour scheme of some webpages and continued to style webpages

Cleaned up files and removed irrelevant/old files

Issues: same as before

Kineta: Started working on the reset password for the settings page.

Issue: had a tiny issue where the information was not updating in the database correctly. Got assistance from Bianco.

29/10/2021:

**Sprint Review Meeting with Rylan**

(See relevant document and video)

Mahdiyah Manjra: Hey Guys, is our meeting with Rylan cancelled today?

Jack: 4

Kineta: I saw the email you're talking about I will confirm

Mahdiyah Manjra: Okay, thanks 👍

Kineta: <Media omitted>

Kineta: But we are still meeting as a group at 4PM to make this video. the only change is that Rylan won't be there. I will send a link shortly

Mahdiyah Manjra: Okay 👍

Kineta: Sorry for the inconvenience guys

Ryan: Sorry guys, something just came up and I won't be able to attend the meeting, I let Jack know of all the changes I made so he can show them

Bianco Van Der Ross: <https://meet.google.com/efw-xavk-tnu>

Kineta: Hi Everyone. I've just sent you an email with the video for the sprint review, let me know what you think 🙌

Mellisha: Made Unit tests and wrote release on GitHub

Mahdiyah Manjra: Today: Completed the missed appointment notification functionality and uploaded all relevant files to GitHub

Issues: None

Deshan: Worked on Removing cancelled booking from list. Implemented with strikethrough

Issues: None

Jack: Working on replicating work for doctor side

Issues: our email was hacked

Kineta: Today I worked on the video for the sprint 4 review meeting since Rylan was unable to attend the meeting.

Issues: Travis CI seems to be giving issues and we need to find an alternative solution to the email address since our current email has been compromised.

Bianco Van Der Ross: Continued debugging and adding other group members files to main file

Issues: email not working

30/10/2021:

Kineta: If you guys are happy with the video, please can I get a thumbs up. I'd like to send this to Rylan ASAP 🙏

Mahdiyah Manjra: 👍

Deshan: 👍

Jack: 👍

Mellisha: 👍

Ryan: 👍

Kineta: I've emailed it to Rylan ✨

Bianco Van Der Ross: 👍

Kineta: Hi Everyone ✨ please can I ask that you start sending your daily scrum messages through 🙏

Bianco Van Der Ross: Lol I see how some of you coded 😂 haii its fine but now I need some explanations as to what goes where cause I'm trying to piece this puzzle, but some roads are leading me nowhere

Bianco Van Der Ross: <Media omitted>

Zahraa: Hi, I didn't do the JavaScript for it, but from what I understand in the appointment history page if a user clicks on view appointment form, this shows up and it's the notes from that appointment

The same thing should show up for both the doctor and patient

I'm still looking for a template to make it look nicer

Also, I can add a back button but then they'd be different pages because one should lead back to the doctor, and one should go back to the patient

Bianco Van Der Ross: No worries ,just trying to follow the trail and debugging everyone's code as I go

Bianco Van Der Ross: Continued Debugging and reworked some group members files. Added new files that were missing or faulty for numerous files from older sprints and new sprints

Issue: Testing out new code from other group members .Not working with main file. Emails still an issue

Kineta: Emailed the sprint 4 review video to Rylan. Worked on the documentation for the daily scrum meetings. No issues.

Jack: Working on working on the same thing as yesterday

Issues: had to reconstruct past and upcoming appointment, no major issues

Mellisha: Made Unit tests and wrote release on GitHub

**31/10/2021:**

Bianco Van Der Ross: Cleaned and finalised Debugging of existing and new files made by me. Made new password pages and files

Issues: Need to discuss with other group members to fix issues of integration. Email still an issue. Need to implement email with forgot password

Kineta: Today I worked on the documentation for the daily scrum meetings and some fixes to GitHub.

Issues: Travis CI has stopped working due to some payment plan problems. Mellisha is currently looking into Circle CI

**01/11/2021:**

**Sprint Retrospective Meeting**

**(See relevant document)**
