

SPRINT #3

DAILY SCRUM MEETINGS

Purpose – to discuss what has been done the previous day, what will be completed today and what challenges we may be facing.

29/09/2021:

Sprint Planning Meeting with Rylan (see relevant documents)

Kineta: Hi Guys, don't forget that we're meeting with Rylan today at 2:30 🙏 the link is in the description

I also just want to ask is everyone available for a group meeting on Friday. It won't be long, but I think there's a few things we need to discuss and address

Bianco: Thanks. As it stands, I should be available anytime 🙏

Mahdiyah Manjra: I am available too 👍

Ryan: I should be available anytime on Friday

Mellisha: I'm cool with Friday

Zahraa: I'm available as well

Jack: Sure

Deshan: Yeah. That should be fine

Deshan: 2:00?

Kineta: Yeah, 2 or 2:30 or 11:30 depending on when everyone is available. Can everyone please pick a time?

Mahdiyah Manjra: 11:30 is fine with me

Bianco: Same here

Zahraa: Same

Deshan: I'm good with 11:30 too

Ryan: I'm fine with anytime

Mellisha: Same

Kineta: Hey Everyone 🙏 since the app is already set up in terms of code coverage on the current GitHub, I'll be creating everything the second one to be set up for the website. Hope this is okay 🙏

The task board for this sprint will be up on Friday.

Bianco: All good 🙏 Thanks 🍋

Kineta: I've sent everyone an invitation for the new GitHub, please check your emails 📧

01/10/2021:

Kineta: Hi Everyone, don't forget group meeting at 11:30 today

Bianco: 🙏

Kineta: Thanks for joining the meeting everyone 🙏

Sorry for being that bi^ch but certain things needed to be said. Again, a little bit of participation, communication and effort goes a long way, so let's kill this project like how we did in Semester 1 and get that Distinction 🤝 💯 🔥

Kineta: The Sprint 3 Task board is up on Taiga. so, pick your poison. And just a little reminder, this sprint is extremely short, so everything needs to be done by Sunday the 10th so that there's no issues when we present to Rylan on the Monday, and the tutor on the Tuesday.

Please can I also ask that everyone completes their work by next Wednesday (we write OS on Friday, so I don't want to leave it for Thursday) the reason I'm asking for Wednesday is so that @27732580893 has enough time to make the website look amazing, and so that the rest of us all have enough time to make sure that the work we've done connects to the database nicely. I don't want us to be struggling with backend work on Sunday night and Monday morning before we're supposed to present. Also, if you feel like this sprint is too much, please let me know because then I can email Rylan asking him to remove some of the user stories from this sprint

Mellisha: Cool thank you!

Kineta: Created and set up the sprint 3 task board with fully documented stories and acceptance criteria

Deshan: Sorted the Read and write to the database

02/10/2021:

Deshan: Worked on getting the specialist lists dropdown menu to display

Kineta: Worked on updating wikies on Taiga and GitHub

03/10/2021:

Kineta: Today: I updated the backlog refinement meeting, made a document for the sprint planning meeting, and started working on my contribution for the website

No issues so far

Bianco: Yesterday .Worked on redoing doctor and patient booking viewing

Today : continued working on redoing booking viewing

Issues: none

Deshan: Worked on saving calendar information to the doctors database. No issues

Mellisha: Today : Began to migrate unit tests to Android Studio. Issues : Lots

04/10/2021:

Mellisha: Yesterday: unsuccessfully attempted to build Android Project with Travis and Codecov

Issues: same as yesterday

Kineta: Worked on Displaying appointment History

Issues: JavaScript file to connect to database

Ryan: Looked at ways at implementing automatic emailing on appointment booking

Issues: none

Zahraa: Today: Worked on fixing styling issues from last sprint including redesigning help page

Issues: none

Jack: testing sharing project with ryan so he can code on it as well

issues – none

05/10/2021:

Mellisha: Yesterday: unsuccessfully attempted to build Android Project with Travis and Codecov. Issues: same as yesterday

Kineta: Today: continued working on displaying appointment history. Still busy with the JavaScript files

Ryan: Worked on allowing patient to view appointment history. Issues: none

Deshan: Worked on loading the times into the availDoc

Bianco: worked on improving doctors booking ,made a cheat sheet for database connection for the web team

Zahraa: Today: Worked on restyling the setting page, privacy policy page and personal info pages. Issues: None

Jack: failed to share main github a sub git hub was created

start working on project

issues - as mentioned

Kineta: Hi Everyone ✨ please could I just ask you all to send a message on what you're working on for this sprint 🙏

Mahdiyah Manjra: Hey, I am working on sending the confirmation email when a booking has been made.

Deshan: I'm working on displaying a list appointment and the booking form

Kineta: I am working on:

1. Updates to settings page
2. On the appointment history for patients and doctors

Bianco: Same but from the doctor's perspective. Just going to upload a js file so everyone has a quick reference on how to read and write to the database

Kineta: Okay cool, so this is what's done already

☑ login and registration

- ✓ Home pages
- ✓ Appointment form and saving this information in the database
- ✓ Doctors availability
- ✓ Patient bookings (updates being implemented in this sprint)

I'm just making sure and checking in with everyone so that we're not clashing with each other and being repetitive with work or doing work that's already been done 🙏

Is anyone unsure of what they need to do or what they are supposed to be working on?

I know this sprint is super short, but we can do it guys 😞🔮 Please try and have your html files uploaded by Thursday the very latest so that Zahraa can work her magic 🦄🌈

Bianco: So, guys I've uploaded a js file called ReadWrite.js its under sprint 3 in the semester 2 repository. I tried commenting as much as I could to make it as clear as possible. It's becoming really time consuming for me going back and forth explaining how to do this the whole time. I don't mind helping but please try on your own ,I learnt through trial and error and it's not that bad once you understand it .so really try it out before messaging me again about having issues. I know its quicker to message me if you are having issues but still like I'm saying its time consuming for me to stop what I'm doing every time .So I really hope this helps .

Mahdiyah Manjra: Thank you for your help 👍

Bianco: No worries. I'll be commenting all the js files I've already made when I have time in case anyone wants to reference anything as they go ,I'll let you all know when I put it up 🤞

Kineta: Thanks so much dude 🙏😞

Zahraa: Hey. I'm working on fixing styling issues from last sprint, including redesigning the help page, and I'm creating an appointment history tab on the doctor and patient homepages

06/10/2021:

Kineta: Hi Everyone, I'd like to book our next meetings with Rylan.

Is everyone okay with 4PM on Monday and 2:30PM on Wednesday?

Bianco: Yebo yes 🤖

Mellisha: Yeah 👍

Ryan: Yeah, that's fine

Jack: Ok

Mahdiyah Manjra: Yes, 👍

Deshan: Yeah, That's cool

Zahraa: Yeah, that's fine

Mellisha: Yesterday: Successfully made and built unit tests with JavaScript. Issues: none

Deshan: Worked on loading upcoming appointments to patHome

Bianco: worked on adding toast messages and completed implementation .Started working on backlog items

Mahdiyah Manjra: Today: Started researching ways to send email notifications from database
Issues: Difficulty finding a method without using file extensions

Zahraa: Today: Continued restyling additional webpages
Issues: None

Kineta: Continued working on displaying patient history. Got help from Deshan

07/10/2021:

Ryan: Completed the patient history viewing

Deshan: Helped load appoints history

Bianco: fixed bugs with patient login and added more toast messages .

Cleaned up code for readability. Worked on implementing the rest of the teams work into main project had some issues with file structure

Mahdiyah Manjra: Today: Tried a different approach to connecting to the database. Created test files in database. Issues: None

Zahraa: Today: Added the appointment history tab and worked on styling the appointment history webpages. Issues: none

08/10/2021:

Ryan: Started working on sending automatic emails to doctors and patients

Bianco: continued working on backlog for a bit. No issues

Mahdiyah Manjra: Today: Created a read file to get booking information for the email from the database. Issues: None

Kineta: Made some changes to the GitHub pages. No issues.

Zahraa: Today: Continued styling pages, updated the help page. Issues: none

Jack: continue working on the app. issues - none

09/10/2021:

Ryan: Completed worked on sending the automatic emails. Issues: none

Mahdiyah Manjra: Today: Started working on sending the email notifications from database
Issues: Unable to find a good way to send emails

Zahraa: Today: Worked on styling the saved appointment form pages.
Issues: Some formatting issues

Jack: continue working on the app. issues - none

10/10/2021:

Kineta: Good Morning Everyone 🌞

Just a little reminder that we are presenting sprint 3 to Rylan tomorrow. Can I please ask both teams to get everything for tomorrow's meetings? And please will you send your daily scrum messages so that I can put the documentation together 😊

Deshan: looked at generalising booking appointments/Synthesis

Mahdiyah Manjra: Today: Started working on sending the email notifications from database.
Issues: Unable to find a good way to send emails

Zahraa: Today: continued to work on the saved appointment homepages and finalized designs for other webpages

Issues: same as yesterday

Kineta: Worked on project document and proof of meetings

Jack: continue working on the app. issues - none

Zahraa: Hey guys 🌸 Hope everyone is keeping well

I've uploaded the redesigned pages

There are still a few things I'm working on, but I've just uploaded if anyone wants to see it/needs it. Apologies for it being so late, there has been loadshedding and it slowed me down a bit 🐒

A couple of things:

- there's a webpage called availdocs that shows available doctors but I'm not sure where to put it since the available doctors are seen when booking an appointment

- also, there is two pages called appointmentFormDisplay and bookingData that are quite similar in that they show the saved information from the appointment form...I'm not sure which one to use

- lastly, for some reason the appointmentFormDisplay and bookingData pages just won't format correctly so I'm still working on that...there is version uploaded but it's just preliminary, I hope to get it sorted 🙌

If anyone has any suggestions or is not happy with anything, please let me know. Like I said there are a few kinks I need to work out, but the pages are workable. If there's anything that's not right with them, please let me know

Kineta: Please use appointmentFormDisplay 🙏 that's for the patient history. Thanks so much for everything!!

Zahraa: Okay 👍

Bianco: 🙌 Thanks

Deshan: Hi Zaara. AvailDocs is an outdated page. You can remove it. It was replaced with patAppoint

Zahraa: No problem ✨

11/10/2021:

Sprint Review Meeting with Rylan

Sprint Retrospective Meeting

(See relevant documents for both)
