

SPRINT #1

SPRINT RETROSPECTIVE MEETING

Purpose – to discuss how we felt about this sprint, to see what worked well and what did not work well. This meeting could also give insight into areas of improvement and how the challenges we faced could be avoided in future sprints.

06/09/2021:

Mahdiah Manjra: Overall I think that the team worked well together despite having to start a new project from scratch. There were a few issues with setting up the database, but the team worked hard. I am happy with the team's efforts and the progress made

Kineta: Overall, I think that the group worked well together. Starting a new project was exciting and challenging at the same time. Our plan to split the work into 2 teams (one for the app and one for the website) seems to be working so far but we may need extra assistance for the website in later sprints. Communication is an issue we need to address, and I definitely think it will help us create a more uniformed project. Other than that, I am happy with the work everyone has produced, and I look forward to seeing what we can accomplish in future sprints.

Mellisha: Overall I think the sprint went well as we managed to create a functioning app and website. I am happy with everyone's effort, and I hope we can continue this momentum for the next sprint

Ryan: For our 1st sprint on a new project. Everything went smoothly. We managed to simultaneously work on the app and website. I'm confident if we continue to work at this pace that we will be able to complete all tasks in future sprints

Bianco Van Der Ross: Overall ,the sprint went well. We managed to create a working app and functioning webapp. Considering we are split into two subgroups communication overall needs to improve. No one voiced any issues or concerns to me in regard to reading and writing to the database. So, I assume all is well there .

The main goal was getting core components up and running which, we achieved, and I am very proud of.

Taking the above in consideration moving forward we should work a lot faster and core elements should not be an issue anymore

I am happy with everyone's effort so far .

Zahraa: Overall I think the sprint went well, everyone worked on their part, and we managed to get the app and web app functioning

If we continue to work diligently through the sprints, we can deliver a great final product

Jack: Everything was fine for sprint one is there was some difficulty learning new database, but everything should be a smooth sail from now on

Deshan: So far everything seems to be running smoothly and the group has made good progress for sprint 1. Everyone is working well together, but there could be improvements with communication and collaboration. If we continue working like this, then I think we'll be able to accomplish a lot in the next few sprints.
