SPRINT #1

SPRINT REVIEW MEETING

Purpose – to present our project to the client and show/ demonstrate the work we have completed for this current sprint.

06/09/2021:

Overall, the client was very happy with the work we have produced thus far. He loved the name of our medical platform and gave us positive feedback on the app as well as the website. He did have some recommendations for us but all these recommendations and be corrected by the next sprint.

Suggestions:

- Hash passwords in the database
- Have the same colour scheme for the app and website so that everything looks more uniformed
- Have a central back-end for the app and website.
