SPRINT #4

SPRINT REVIEW MEETING

Purpose – to present our project to the client and show/ demonstrate the work we have completed for this current sprint.

29/10/2021:

Please visit the following link to see the sprint 4 review meeting.

Overall, the client was happy with what we have done and was glad to see that the app and website was working the way it was expected to work. There were some suggestions and areas of improvements but other than that no major issues.

Some recommendations:

- Have you secured your website and fixed the hacked email issue? Remember to not include the access details to your Gmail account when you push to GitHub.
- The colour scheme of the website feels a bit off, the white background and the cards seem to clash with each other. You want to investigate the user experience with regards to this. However, this is not a major issue.
- Travis may have updated their T&Cs. I suggest limiting the number of automatic builds for the purpose of not running out of credits. Alternatively, you can create a new Travis account and connect that to your repo.

Good morning, Kineta,

Review
1. Functionality of the app and website work as expected. That's good.
2. Have you secured your website and fixed the hacked email issue? Remember to not include the access details to your Gmail account when you push to Github.
3. The colour scheme of the website feels a bit off, the white background and the cards seem to clash with each other. You want to investigate the user experience with regards to this. However, this is not a major issue.

TravisCI
Travis may have updated their T&Cs. I suggest limiting the number of automatic builds for the purpose of not running out of credits. Alternatively, you can create a new Travis account and connect that to your repo.

If you have any questions, please let me know.

Kind regards,
